A SEWING PATTERN BY

ninja scoodie

This project is of course a take on the hood/scarf combination called a scoodie. With an added face mask, scarf pockets, and added shuriken, you have an accessory with a ninja twist! The pattern itself is good on its own as a scoodie if you leave off the optional details.

DIFFICULTY: ■■■■■□□□□□□

Pretty straightforward, although there's a bit of hand sewing and other minor details.

MAKES:

one adult scoodie that fits a head from about 20" to 24" in circumference

MATERIALS & TOOLS

- 1 1/4 yds. of black fleece
- 1/4 yd. of gray fleece
- Two buttons, about 1" wide
- Black fabric paint OR:
- Appliqué supplies:
 - 3" x 3" scrap of black appliqué fabric
 - 3" x 3" scrap of light or heavy-weight fusible web
- Matching sewing thread
- Basic sewing tools (sewing machine, scissors, iron, needles, pins, fabric marker, seam ripper)

BEFORE YOU BEGIN:

1. Print out the project pattern, pages 9-16
2. Assemble the printed pattern pieces
3. Lay out the pattern pieces on your fabric and cut them out
4. Mark the fabric pieces with the guidelines from the pattern

SEWING TUTORIAL

1

First up is getting the pockets ready for the scoodie. Since we're using fleece, a simple single-fold hem for the top edge of the pockets will suffice. I did a quick zigzag stitch along the raw edge to make it look nicer, but after that all you need to do is fold under the straight edge of the pocket by 1/2" and sew it in place. Repeat this with the other pocket piece as well.

2

Now we're free to add these to your hood pieces. Two of your hood pieces will be designated as the lining, while the remaining two will be the outer hood. You might want to label these parts now to avoid confusion (as well as what's the right and wrong side). With both right sides facing up, baste the curved edge of the pocket to the bottom of the outer hood scarf area. The top of the pocket is of course left free so you have your pocket all ready to go! Repeat this with the other pocket piece and the other outer hood piece.

3

Sew your two outer hood pieces together along the curved edge that forms the crown of the hood. Repeat this with the lining pieces as well, but be sure to leave an opening in the top as the pattern indicates for turning the hood right side out.

3

Now take both of your outer hood and hood lining pieces and match up the raw edges around the entire perimeter with right sides together. Sew around this entire shape so now you have a nice double-thick hood with finished edges all the way around. Clip and trim your seam allowances, turn the hood right side out, and press the seams.

SEWING TUTORIAL

5

With main hood all done, all that's left is to close up the opening. Simply tuck in the seam allowances in the opening left in step 3 and sew it closed with a ladder stitch.

6

Now for the face mask: simply sew both sides together with right sides facing, leaving an opening along the straight side as the pattern indicates. When you finish, clip the corners, turn the mask right side out, and press the seams.

Just like with the opening of the hood, sew the opening in the face mask closed with a ladder stitch as well.

7

Once the face mask is done, you'll need to sew some button holes in the corners where the pattern indicates so you can attach it to the hood later. The size of your button holes should be based on the size of buttons you have, just be sure they're sewn in the upper corners of the mask.

8

9

Next you'll need to add the button to the inside of your hood so the mask can be attached there, simply stitch one on each side of the hood lining where the pattern marking indicates. If you're making this for someone with a smaller head, you'll probably want to move the button inward and upward so it fits better, while for someone with a larger head, move the button outward and downward. It also helps to try pinning the mask on first to find a placement that works well for you :D

10

Now onto the shuriken! To make the center "hole," I simply appliquéd a little black circle in the middle of the shuriken shape. You could also paint the hole with fabric paint, but I used some scrap black fleece, lightweight fusible web, and a satin stitch to sew it down. Repeat this with another one of your shuriken pieces as well so you have two front sides.

Sew the shurikens together by matching up an appliquéd half with a non-appliquéd half. Then sew around the entire perimeter of the star. Clip the seam allowances around the curves. Then to turn it right side out, clip a little hole in the center back of the shuriken about 1" long, and use chopstick or similar turning tool to turn the whole thing right side out.

11

All that's left is to sew the shurikens to the ends of your scoodie! Simply lay the back of the shuriken over the lining of the hood (opposite to the pocket), and stitch it in place with a ladder stitch going all the way around the center of the shuriken. The hole you cut previously should be completely hidden now. Repeat this with the other side of the scoodie and YOU'RE DONE!
